PROFESSIONAL SUMMARY

QC Engineer with 1.5+ years in Japanese IT outsourcing, testing B2C e-commerce web and mobile products in Agile teams; owned authentication and payment testing for new payment methods on assigned flows. Built Pocket QA, a published Chrome test-automation extension. Seeking a manual + automation QC role.

SKILLS

Testing & Tracking	Postman, Chrome DevTools, Redmine, Excel, Google Sheets
Testing Types	Manual Testing, API Testing, Database Testing, Mobile Testing, Regression, UI, UAT
Automation (personal)	Playwright, Selenium
Code & Databases	JavaScript, C#, Python, MySQL, SQL Server, Git
Tools from training	Katalon, JMeter, BrowserStack
Languages	English – Intermediate (reading specifications)

PROFESSIONAL EXPERIENCE

QC Engineer

02/2025 – Present

Lampart Co., Ltd. — *Ho Chi Minh City*

Japanese IT outsourcing · Intern from 02/2025, full-time from 04/2025

- Owned testing of the authentication and payment steps for new payment methods on assigned flows, including GMO credit card (3-D Secure) and Amazon Pay: refunds, cancellations, 8%/10% tax rounding, promotions.
- Tested two B2C e-commerce web & mobile products (15 and 4 months) in teams of 15–30 people with 4–9 QCs.
- Ran functional and regression testing each sprint on web and Android/iOS (real devices, DevTools emulator); supported client UAT by investigating issues and verifying fixes on production.
- Conducted API testing with Postman; wrote SQL (JOINs across 4–5 tables, subqueries, GROUP BY/HAVING) on MySQL and SQL Server to verify CSV imports and reconcile order totals between API and database.
- Reviewed BA documents to identify requirement gaps; maintained test cases/plans in Excel & Google Sheets and tracked defects via Redmine through the full lifecycle.
- Created QA checklist templates, helped document the payment business flow and onboarded a new QC member.

PROJECTS

Pocket QA — Web Test Automation Extension

12/2025 – Present

Role: QA / Developer | Solo project *Published on the Chrome Web Store* · *Demo: kt-hg.github.io/Promo--Pocket-QA*

Self-built, published Chrome extension that records a tester's actions and replays them as regression tests, with a pass/fail result and a ready-to-paste bug report.

- 17 action types (iframes, assertions, conditions, branching); data-driven (CSV), sequenced and scheduled runs.
- Reports each run as Passed / Failed / Test broken, with a Markdown bug report (repro steps, screenshot), image diff and XLSX/HTML/ZIP export.
- Built-in test design (Equivalence Partitioning, Boundary Value Analysis, decision tables); exports tests to Selenium (Python, Java), Playwright and Robot Framework.

Technologies: JavaScript ES6+, Chrome Extension MV3, CDP, SQL

Tool Shop (Training project)

12/2024

Role: QA | Solo project

Tested an online e-commerce platform: Functional, UI, Performance and API testing; automated selected regression cases.

Technologies: Katalon, Postman, JMeter, BrowserStack

EDUCATION

VNUHCM - Univ. of Science (HCMUS)

2021 – 2025

B.Sc. in Information Technology — *Graduated 10/2025*

Relevant coursework: Software Testing, Database Systems, OOP
